

RANGGA PUTRA RAMDHANI

Software Engineer — Frontend Focus

+62 813-8358-5869 · ranggaputra681@gmail.com · [LinkedIn](#) · [Portfolio](#) · Bandung, Indonesia

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 4+ years of experience building scalable web applications across full-time employment, freelance client work, and product development. Specialized in React, Next.js, and Angular with a strong eye for pixel-perfect UI and end-to-end product thinking. Proven track record managing up to 9 concurrent products, reducing bugs by up to 50%, and delivering features from design to deployment. Comfortable across the full stack — from crafting responsive UIs to building REST APIs and designing database schemas.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP

Frontend: React.js, Next.js, Angular, Tailwind CSS, Bootstrap 4 & 5

Backend: Node.js, Express.js, Laravel, CodeIgniter

Database & Tools: PostgreSQL, MySQL, Prisma ORM, Git, REST API Integration, MQTT

Concepts: Component-Based Architecture, State Management, Responsive Design, Frontend Architecture, Form Schema Design

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | iMomen (Digital Invitation Platform) *Jun 2026 – Present*

- Building a self-service digital invitation platform from the ground up with a technical partner, contributing across the full stack — from UI to API to database.
- Developing the frontend with Next.js and Tailwind CSS, including an invitation builder powered by a dynamic form-schema system for flexible, user-configurable invitation templates.
- Building the backend REST API using Express.js with Prisma ORM and PostgreSQL, designing the database schema to support multi-template, multi-user invitation management.
- Driving product decisions on builder UX, template architecture, and self-service user flows from end to end.

Frontend Developer | PT. Adhikari Inovasi Indonesia *Jan 2024 – Jun 2026*

- Developed and maintained scalable, responsive web applications across 9+ concurrent product lines, contributing to ~70% of active feature delivery.
- Reduced application bugs by up to 50% through proactive debugging, code refactoring, and improved development practices.
- Architected a real-time POS system with MQTT-based kitchen display integration, localStorage cart persistence, dynamic category tabs, voucher system, and QR-based payment flow.
- Built an Angular-based parking management system with role-guard routing, permission-based access control, gate CRUD, financial reporting, and thermal/Excel/PDF export.
- Developed a photobooth application suite including a dark-themed dashboard (Tailwind v4), A3 print layout, canvas-based photo filters (Pixels.js), and QR code scanning.
- Digital invitation & ticketing system** — Implemented server-side pagination, QR batch scanning, FullCalendar event management, and group/individual ticketing flows in CodeIgniter.
- Integrated frontend systems with RESTful APIs; collaborated with UI/UX designers and backend engineers to consistently ship production-ready features.

Freelance Full-Stack Developer | Independent / Self-Employed *Aug 2022 – Nov 2024*

- Completed 30+ web development projects across various industries, managing the full development lifecycle from requirements gathering to deployment.
- Delivered pixel-perfect, responsive UIs from Figma/XD mockups using Tailwind CSS and Bootstrap, receiving consistent positive client feedback on design fidelity.

Full-Stack Web Developer (Internship) | Vaganza

Jul 2023 – Oct 2023

- Designed and developed a full-featured donation platform with integrated CMS using Laravel, MySQL, and Eloquent ORM.
- Built dynamic, responsive pages from UI/UX mockups using HTML, Bootstrap, CSS, and SCSS; managed full development lifecycle including cross-browser compatibility.

IT Support (Internship) | Diskominfo Jawa Barat

Oct 2021 – Feb 2022

- Maintained legacy PHP applications, developed an Employee Attendance Information System, and gathered user requirements to support system improvements.

NOTABLE PROJECTS

iMomen — Digital Invitation Platform · Next.js · Tailwind CSS · Express.js · Prisma ORM · PostgreSQL

Self-service invitation builder with a dynamic form-schema engine for user-configurable templates. Full-stack architecture: Next.js frontend, Express.js REST API, Prisma ORM with PostgreSQL. Currently in active development.

AWH Mini Cafe POS System · Laravel Blade · JavaScript · MQTT · Bootstrap 4

Real-time POS with MQTT kitchen display, cart overlay, QR payment, voucher system, and localStorage persistence — later reskinned as KKOMI POS for a separate client.

Parking Management System — Dusun Bambu · Angular · CodeIgniter · REST API

Full-featured parking system with RBAC, gate CRUD, pivot-table reports, financial reporting, and thermal (80mm) / Excel / PDF export with server-side pagination.

Selkachi Photobooth Suite · Laravel Blade · Pixels.js · Canvas · JavaScript

Photobooth app with collapsible dark dashboard, A3 newspaper print layout, canvas-based beauty filters, QR scanning, and CSP-compliant deployment.

EDUCATION

Bachelor of Informatics Engineering | Politeknik Pos Indonesia

Sep 2017 – Dec 2022
