

RANGGA PUTRA RAMDHANI

Software Engineer — Frontend Focus

+62 813-8358-5869 · ranggaputra681@gmail.com · [LinkedIn](#) · [Portfolio](#) · Bandung, Indonesia

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 4+ years of experience building scalable web applications across full-time employment, freelance client work, and self-initiated products. Specialized in React, Next.js, and Angular with a strong eye for pixel-perfect UI and end-to-end product thinking. Proven track record managing up to 9 concurrent products, reducing bugs by up to 50%, and delivering features from design to deployment. Effective collaborator across design, backend, and stakeholder teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP

Frontend: React.js, Next.js, Angular, Tailwind CSS, Bootstrap 4 & 5

Backend: Node.js, Express.js, Laravel, CodeIgniter

Database & Tools: MySQL, Prisma ORM, Git, REST API Integration, MQTT

Concepts: Component-Based Architecture, State Management, Responsive Design, Frontend Architecture

PROFESSIONAL EXPERIENCE

Co-Founder & Frontend Engineer | Digital Invitation Startup (iMomen)

Jun 2026 – Present

- Co-founding a self-service digital invitation platform with a technical partner, leading product strategy, UI/UX design direction, and frontend engineering.
- Designing core product architecture and user flows for a self-serve invitation builder, leveraging domain expertise from prior client work in the digital invitation space.

Frontend Developer | PT. Adhikari Inovasi Indonesia

Jan 2024 – Jun 2026

- Developed and maintained scalable, responsive web applications across 9+ concurrent product lines, contributing to ~70% of active feature delivery.
- Reduced application bugs by up to 50% through proactive debugging, code refactoring, and improved development practices.
- Architected a real-time POS system with MQTT-based kitchen display integration, localStorage cart persistence, dynamic category tabs, voucher system, and QR-based payment flow.
- Built an Angular-based parking management system with role-guard routing, permission-based access control, gate CRUD, financial reporting, and thermal/Excel/PDF export.
- Developed a photobooth application suite including a dark-themed dashboard (Tailwind v4), A3 print layout, canvas-based photo filters (Pixels.js), and QR code scanning.
- Integrated frontend systems with RESTful APIs; collaborated with UI/UX designers and backend engineers to consistently ship production-ready features.
- Digital invitation & ticketing system — Implemented server-side pagination, QR batch scanning, FullCalendar event management, and group/individual ticketing flows in CodeIgniter.

Freelance Full-Stack Developer | Independent / Self-Employed

Aug 2022 – Nov 2024

- Completed 30+ web development projects across various industries, managing the full development lifecycle from requirements gathering to deployment.
- Delivered pixel-perfect, responsive UIs from Figma/XD mockups using Tailwind CSS and Bootstrap, receiving consistent positive client feedback on design fidelity.

Full-Stack Web Developer (Internship) | Vaganza

Jul 2023 – Oct 2023

- Designed and developed a full-featured donation platform with integrated CMS using Laravel, MySQL, and Eloquent ORM.
- Built dynamic, responsive pages from UI/UX mockups using HTML, Bootstrap, CSS, and SCSS; managed full development lifecycle including cross-browser compatibility.

IT Support (Internship) | Diskominfo Jawa Barat

Oct 2021 – Feb 2022

- Maintained legacy PHP applications, developed an Employee Attendance Information System, and gathered user requirements to support system improvements.

NOTABLE PROJECTS

AWH Mini Cafe POS System · *Laravel Blade · JavaScript · MQTT · Bootstrap 4*

Real-time POS with MQTT kitchen display, cart overlay, QR payment, voucher system, and localStorage persistence — later reskinned as KKOMI POS for a separate client.

Parking Management System — Dusun Bambu · *Angular · CodeIgniter · REST API*

Full-featured parking system with RBAC, gate CRUD, pivot-table reports, financial reporting, and thermal (80mm) / Excel / PDF export with server-side pagination.

Selkachi Photobooth Suite · *Laravel Blade · Pixels.js · Canvas · JavaScript*

Photobooth app with collapsible dark dashboard, A3 newspaper print layout, canvas-based beauty filters, QR scanning, and CSP-compliant deployment.

EDUCATION

Bachelor of Informatics Engineering | Politeknik Pos Indonesia

Sep 2017 – Dec 2022
