

RANGGA PUTRA RAMDHANI

SOFTWARE ENGINEER — Frontend Focus

+6281383585869 · ranggaputra681@gmail.com · [LinkedIn](#) · [Portfolio Website](#) · Bandung, Indonesia

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 4+ years of experience building scalable and high-performance web applications. Specialized in React and modern frontend architecture, with proven experience handling multiple concurrent products and delivering user-centric solutions. Strong in API integration, performance optimization, and cross-functional collaboration to accelerate product delivery and improve user experience.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP

Frontend Technologies: React.js, Next.js, Angular, Tailwind CSS, Bootstrap 4 & 5

Backend Frameworks: Node.js, Express.js, Laravel

Concepts: State Management, Component-Based Architecture, Frontend Architecture Design, REST API Integration

Tools & Platforms: Git, Prisma

AI Tools: Claude Code, Antigravity, ChatGPT

CORE COMPETENCIES

Responsive Design · Frontend Engineering · Product Development · Scalable System Architecture · RESTful API Integration · Problem Solving

PROFESSIONAL EXPERIENCE

PT. Adhikari Inovasi Indonesia | January 2024 – April 2026

Frontend Developer

- Built and maintained scalable, responsive web applications across multiple product lines in a fast-paced development environment.
- Contributed to approximately **70% of active project development**, playing a key role in feature delivery and product enhancements.
- Managed development tasks across **up to 9 concurrent products**, ensuring timely delivery and consistent code quality.
- Reduced application bugs by **up to 50%** through proactive debugging, code improvements, and better development practices.
- Identified and resolved critical bugs while optimizing application performance, improving load time and overall user experience.
- Integrated frontend systems with RESTful APIs to enable seamless and efficient data communication.
- Collaborated closely with UI/UX designers and backend engineers to deliver high-quality, user-centric features.
- Optimized application performance and improved maintainability through structured and scalable frontend architecture.

Vaganza | July 2023 – October 2023

Full-Stack Web Developer (Internship)

- Designed and developed a full-featured donation platform with an integrated CMS using Laravel, MySQL, and Eloquent ORM.
- Built dynamic, responsive web pages from UI/UX mockups using HTML, Bootstrap, CSS, and SCSS.
- Partnered with UI/UX designers to evaluate and validate technical feasibility of proposed designs.
- Coordinated with clients and developers to align on project requirements, goals, and deliverables.
- Oversaw the complete development lifecycle from design to deployment, ensuring cross-browser compatibility.

Diskominfo Jabar | *October 2021 – February 2022*

IT Support (Internship)

- Assisted in maintaining and debugging legacy PHP-based applications to ensure system stability.
- Gathered and analyzed user requirements to support system improvements and feature development.
- Developed an Employee Attendance Information System to streamline internal administrative processes.
- Contributed to system optimization and minor feature enhancements.

EDUCATION

Politeknik Pos Indonesia | *September 2017 – December 2022*

Bachelor of Informatics Engineering
